Message from the Editor-in-Chief

Welcome to *Medical Sciences*, an open access journal covering the basic and translational science that underlies current medical practice and seeks to answer fundamental questions about disease and examine topics in biology relevant to medicines.

Researchers in academic and clinical settings as well as health professionals are encouraged to publish their theoretical and experimental results in this journal, which aims to integrate expertise from the molecular and translational sciences, therapeutics, and diagnostics in different medical specialties.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **High Visibility** Indexed in DOAJ and PubMed
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Rapid Publication** First decision is provided to authors approximately 22 days after submission; the average time between acceptance to publication is 6 days
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors

Aims and Scope

Medical Sciences (ISSN 2076-3271) is an international open access scientific journal, providing a platform for advances in basic, translational and clinical research. The journal aims to publish original research, review articles, and short communications about molecular and cellular processes in disease, in order to increase understanding of the fundamental principles and biological questions of medicine.

To cover the different medical specialties, *Medical Sciences* is divided into sections:

Pneumology and respiratory diseases, Immunology and infectious diseases, Drug discovery and drug delivery, Cancer and cancer-related research, Endocrinology and metabolic diseases, Hepatic and gastroenterology diseases, Cardiac and Cardiovascular Disease, Neurosciences, Nephrology and urology, Gynecology and Nursing research.

The scope of *Medical Sciences* includes but is not limited to:

- Pathogenesis of disease
- Translational research
- Laboratory and animal investigation
- Pharmacology
- Clinical medicine
- Epidemiologic studies
- Health improvement strategies
